Professional Summary

- Analytics engineer and M.S. Data Science student at Milano-Bicocca, based in Milan. Strong SQL foundation with hands-on experience in dbt data modelling, BigQuery, GCP, and Airflow for building robust data pipelines and mart tables. Built financial and risk-management data platforms processing 30B+ records, and automated pipelines making data instantly available for reconciliation and reporting. Experienced collaborating with engineering and finance stakeholders to ensure data integrity and deliver trustworthy analytics assets.

Education

- **Università degli Studi di Milano-Bicocca** — Milan, Italy
  Master of Science in Data Science — *Oct 2025 – Present*
- **Habib University** — Karachi, Pakistan
  Bachelor of Science in Computer Science; GPA: 3.31/4.0; 100% merit scholarship (HU-TOPS) — *Aug 2020 – May 2024*

Experience

- **Logiciel Services LLC** — United States (Remote)
  Data Engineer I — *May 2024 – Nov 2025*
  - **Financial Data Modelling & Pipelines**: Built an S3 lakehouse with Spark, Trino and AWS Glue for 30B+ financial records with structured medallion layers; applied dbt-style modelling patterns — from raw source ingestion to consumable mart tables — enabling sub-second analytical queries and reliable downstream reporting.
  - **Data Quality & Automation**: Implemented schema control, partitioning, and file compaction to enforce data quality across financial datasets; developed Airflow-orchestrated pipelines (dynamic DAGs from YAML) for consistent, auditable data delivery and reconciliation support.
  - **Stakeholder Analytics**: Built a multi-agent Text2SQL tool (Python, LangGraph, Trino) enabling business and finance stakeholders to self-serve queries over the data lake, reducing analyst turnaround by 41%.
- **United Bank Limited** — Karachi, Pakistan
  Data Engineering Intern — *May 2023 – Jun 2023*
  - **Financial Data Integration**: Built an Informatica pipeline integrating banking data from Qatar and Bahrain into a Hive data lake; validated production pipelines against regional schemas across 3 countries, ensuring data integrity for reconciliation and analytics.
- **ImproData** — Pinedale, WY (Remote)
  Junior Data Engineer — *Jan 2021 – May 2022*
  - **Risk Data Pipelines on GCP & BigQuery**: Built cybersecurity risk-management pipelines in Azure Databricks (PySpark) with bronze, silver and gold layers; automated JSON ingestion into BigQuery via GCP Cloud Functions, eliminating ∼3 hours of daily manual work.
- **Habib University, Office of Institutional Research** — Karachi, Pakistan
  Data Researcher — *Aug 2021 – Sep 2021*
  - **Data Wrangling & Reporting**: Collected, cleaned, and structured institutional datasets using Pandas, NumPy, and Excel to support research reporting and organizational decision-making.
- **EdLab Pakistan** — Remote (Volunteer)
  Data Analysis Intern — *Sep 2021 – Oct 2021*
  - **Exploratory Analysis**: Performed EDA and built Power BI visualizations to communicate key trends to stakeholders.

Projects

- **Astroflow: Bayesian Parameter Inference**: Normalizing-flow framework in PyTorch for predictive modelling; reduced inference from ∼300 minutes to ∼2 seconds. Built a Django interface to run pipelines and visualize posterior distributions.

Skills

- **Data Modelling & Analytics**: SQL, dbt, Python (Pandas, NumPy), R, Power BI, Excel
- **Data Pipelines & Quality**: ETL/ELT, Spark (PySpark, Scala), Databricks, Airflow, Informatica, schema management, data quality checks
- **Databases & Cloud**: BigQuery, PostgreSQL, Trino, GCP (GCS, Cloud Functions), AWS (S3, Glue), Azure Databricks
- **Tools**: Git, Linux, Docker
- **Spoken Languages**: English (C1), Italian (A2), Urdu (native)

Achievements & Test Scores

- **Test Scores**: IELTS 8.0/9.0; GRE Quantitative 165/170
- **Competitive Programming**: ICPC Asia Topi Regionals 2022: 19th place; Google Kickstart (May 2022): 6th place country-wide
