Professional Summary

- Data engineer and M.S. Data Science student at Milano-Bicocca with experience building Python analytics tools, financial data platforms and interactive dashboards. Developed a Text2SQL tool that reduced analyst turnaround by 41% and a PyTorch inference framework that reduced inference from 300 minutes to 2 seconds. Seeking an ML and analytics internship in Milan; skills include scikit-learn, credit decision models, clustering, and ML model deployment and monitoring.

Education

- **Università degli Studi di Milano-Bicocca** — Milan, Italy
  Master of Science in Data Science; Grade: 26/30 — *Oct 2025 – Present*
- **Habib University** — Karachi, Pakistan
  Bachelor of Science in Computer Science; GPA: 3.31; 100% merit scholarship (HU-TOPS) — *Aug 2020 – May 2024*

Experience

- **Logiciel Services LLC** — United States (Remote)
  Data Engineer I — *May 2024 – Nov 2025*
  - **Python Analytics Tool**: Built a multi-agent Text2SQL chatbot (Python, LangGraph, SQL, Trino) exposed through a REST API, enabling business stakeholders to query financial data in natural language and reducing analyst turnaround by 41%.
  - **Financial Data Platform**: Designed and built Kafka, Spark, S3, Trino and Airflow pipelines for 30B+ financial records, queryable in under a second with appropriate filters; simplified a 12-component architecture to 5 and improved reliability through schema control and partitioning.
  - **Reusable ETL Framework**: Developed composable Rust processors and pipelines to replace a legacy .NET utility, cutting daily FIX-log processing from 500 to 50 minutes (10× speedup).
- **Pullflow Inc.** — San Jose, CA (Remote)
  DevOps Intern — *Jul 2023 – Aug 2023*
  - **Dashboard Deployment & DevOps**: Deployed a Budibase analytics dashboard with a zero-downtime cutover; migrated AWS EKS services to MicroK8s using Dockerfiles, Helm charts and Traefik.
- **United Bank Limited** — Karachi, Pakistan
  Data Engineering Intern — *May 2023 – Jun 2023*
  - **Banking Data & AI Pipelines**: Built an Informatica pipeline into a Hive data lake and validated production AI pipelines against regional schemas across Pakistan, Qatar and Bahrain.
- **ImproData** — Pinedale, WY (Remote)
  Junior Data Engineer — *Jan 2021 – May 2022*
  - **Risk Data Pipelines**: Built cyber-security risk-management pipelines with Azure Databricks (PySpark); automated JSON ingestion through GCS and BigQuery, eliminating 3 hours of daily manual work.

Projects

- **Astroflow: Bayesian Inference (Final Year Project)**: Built normalizing-flow models and optimized PyTorch training loops for black-hole population modeling; reduced inference from 300 minutes to 2 seconds. Developed a Django interface to run inference, organize experiments and visualize posterior samples.
- **Bayaaz: Published Mobile App**: Published a Flutter app on Google Play and the App Store; maintain a Python FastAPI backend with PostgreSQL and a React frontend, with CI/CD discipline.

Skills

- **Programming & Engineering**: Python, SQL, Rust, Scala, JavaScript, OOP, Git, CI/CD, DevOps
- **Data & Dashboards**: Pandas, NumPy, Matplotlib, Power BI, Budibase, Django, FastAPI, Spark
- **AI / ML**: scikit-learn, PyTorch, TensorFlow, credit decision models, clustering, model deployment and monitoring, LangGraph
- **Cloud & Databases**: AWS, Azure Databricks, GCP, Docker, Kubernetes, PostgreSQL, BigQuery
- **Spoken Languages**: English (C1), Italian (A2)

Achievements & Test Scores

- **Test Scores**: IELTS 8.0/9.0; GRE Quantitative 165/170
- **Competitive Programming**: ICPC Asia Topi Regionals 2022: 19th place; Google Kickstart (May 2022): 6th place country-wide
